6x AI Power Advancement

With an astounding 6x increase in AI power over its predecessor (AI Engine Gen1), D series with AI Engine Gen 2 stands ready to revolutionize the world with high accuracy object detection and recognition, even at long distances, all while delivering superior image quality.

Edge Dewarping

Edge dewarping engine enables the fisheye camera to dewarp fisheye images by camera rather than backend system. This reduces the integration effort for backend system and also enhances the flexibility of usage.

Grommet Installation

Grommet design offers a secure cabling solution while safeguarding against the intrusion of water, dust, or other external elements. Grommet is typically compact in size. This compactness not only saves space but also eases the installation process as they can be easily inserted into the openings
