Perfect Balance of AI Performance and Affordability

Compared to baseline models, the computing power of this model has been increased by 6 times. This allows for faster processing, high accuracy, and improved recognition of smaller objects at the same resolution.

HDR Engine Gen3

The latest HDR engine delivers excellent, natural high dynamic images. Both details of high light and low light areas are kept, and no blending artifacts are generated.

Crystal Engine Gen3

Under extremely low light environment, Crystal engine gen3 delivers low noise, high quality image without compromising on details. In addition, it also keeps image sharp on motion object.
